# JIYA SIWACH

**AI Engineer · Generative AI · LLMs · RAG · Agentic AI · Machine Learning · AI for Cybersecurity**

Delhi, India · +91-7827465141 · jiyaswiach1234@gmail.com · linkedin.com/in/jiya-siwach-9b5826310 · github.com/jiyasiwach

## CORE SKILLS

**Generative AI & LLMs**
RAG · Hybrid retrieval (vector + BM25, RRF) · Prompt engineering · LLM evaluation (Hit@k, MRR, LLM-as-judge) · Guardrails & prompt-injection defense · AI agents / agentic workflows · Tool calling · LangChain · LangGraph · Hugging Face · OpenAI API · Embeddings

**Machine Learning & NLP**
Scikit-learn · PyTorch · TensorFlow · Text classification · TF-IDF · Feature engineering · Cross-validation · Anomaly detection

**Data & Vector Stores**
Python · SQL · Pandas · NumPy · Matplotlib · ChromaDB · FAISS · MongoDB · MySQL · Oracle

**Backend & Deployment**
FastAPI · REST / SSE · Node.js · Express · React · TypeScript · Docker · Git/GitHub · CI/CD · Render · Vercel · AWS (basics) · OCI

**Security AI**
MITRE ATT&CK · OWASP Top 10 · CISA KEV · Log analysis · Threat intelligence · Digital forensics · VAPT basics

## CERTIFICATIONS

- Generative AI Landscape — Infosys Springboard, 2025
- Introduction to Cybersecurity — Cisco Networking Academy, 2026
- OCI Application Integration Professional — Oracle, 2025
- Database Management Systems — Infosys Springboard, 2025
- Network Topologies & Technologies — Skillsoft, 2025
- Product & Brand Management — NPTEL, 2025

## LEADERSHIP

- **PR & Media Head**, MRISA – Manav Rachna InfoSec Army (2024 – present)
- **General Secretary**, HackWithIndia Student Chapter
- **Student Ambassador**, SET CSE Specialization, Manav Rachna (2025 – present)
- **Core Organizer**, ENIGMA Cybersecurity CTF & Learn IT Tour 2025

## LANGUAGES

English (fluent) · Hindi (native) · German (beginner)

## SUMMARY

AI Engineer building production Generative AI and ML systems at Magppie Wellness Kitchen — LLM/RAG pipelines, agentic workflows, voice AI, FastAPI services, evaluation harnesses and cloud deployment, shipped end to end. B.Tech in Computer Science (Cyber Security & Digital Forensics) with a focus on grounded, guardrailed and measurable AI for security.

## EXPERIENCE

**AI Engineer** Jun 2026 – Present
Magppie Wellness Kitchen, Delhi NCR

- Built an **AI automated call system** combining agentic workflows, LLM integration and voice AI to run customer and sales calls, cutting manual calling effort for the sales team.
- Designed **RAG knowledge flows** with prompt engineering, guardrails and structured outputs so the agent answers product queries accurately from company data.
- Lead architecture and development of the corporate **Learning & Development portal** that centralizes and automates employee training.
- Developed generative-AI applications and predictive ML pipelines on industrial business data to optimize operational logistics and support data-driven decisions.

**Data Science & Analyst Intern** Jul 2025 – Jun 2026
ShadowFox

- Built predictive analytics models on engineering datasets with Python, Pandas and Scikit-learn; earned **Exceptional Performance** honors for production-aligned ML pipelines and EDA.

**Intern – Forensic & Cyber Laws** Jun 2026
Delhi Police

- Trained on cybersecurity frameworks and digital-forensics workflows; analyzed data integrity, digital-evidence protocols and validation reporting.

**Full Stack Developer Intern** Jun 2025 – Jul 2025
TechnoHacks Online

- Built a React.js dashboard on the OpenWeather REST API with optimized real-time state rendering.

## PROJECTS

**CyberSec RAG Copilot — grounded security Q&A with citations** Oct 2026
cybersec-rag-copilot-tan.vercel.app · github.com/jiyasiwach/cybersec-rag-copilot · *Python, FastAPI, ChromaDB, BM25, LLM via OpenRouter, React, TypeScript, Docker, Render, Vercel*

- Built and deployed a RAG assistant that answers only from **MITRE ATT&CK (706 techniques), OWASP Top 10 and CISA KEV** — 948 indexed chunks — citing the exact source passage for every claim and refusing instead of hallucinating.
- Implemented **hybrid retrieval** (ChromaDB vectors + BM25, Reciprocal Rank Fusion, exact-ID boost): **100% Hit@5, 1.0 MRR** on a 20-question set vs 0.87 MRR for BM25 alone.
- Designed a **two-layer prompt-injection guardrail** (weighted regex heuristics → LLM classifier), retrieved context delimited as data: **5/5 attacks blocked, 0 false positives**.
- Streaming answers over SSE with per-answer latency, token and cost metrics (~3 s, ~$0.001/query); LLM-as-judge eval harness and dashboard (faithfulness 1.0, citation accuracy 1.0); Dockerized with rate limiting and CORS.

**AI-Powered Log Anomaly Detection System**
Python, Machine Learning, Cybersecurity AI

- Real-time log analysis and anomaly detection that parses system logs, detects behavioral deviations and flags security threats with visual alerts.

## EDUCATION

**B.Tech, Computer Science & Engineering (Cyber Security & Digital Forensics)** 2023 – 2027
Manav Rachna International Institute of Research and Studies (MRIIRS), Faridabad
